

TEMUULEN GANOCHIR

Software Developer

Ulaanbaatar
temuulev@gmail.com
<https://github.com/temuulengan>

Computer Science graduate from SeoulTech with hands-on experience in full-stack and AI-integrated development. Focused on building reliable, data-driven applications that create real value.

EDUCATION

Bachelor of Science in Computer Science

Seoul National University of Science and Technology (SeoulTech) •

Seoul, South Korea • 08/2026

Relevant Coursework: Artificial Intelligence, Database Systems, Object-Oriented Programming, Open Source Software, Embedded Systems, Unix/Linux Systems, Algorithms & Data Structures

PROJECTS

PortfolioIQ — AI-Powered Financial Portfolio Analyzer (Capstone Project)

- Executed the full Software Development lifecycle for a mobile app analyzing stock/index portfolios.
- Integrated Yahoo Finance API to process real-time market data for automated risk assessment.
- Conducted iterative testing of PDF upload and manual input modules to ensure 100% data ingestion accuracy.

AI Recipe Chat — Intelligent Cooking Assistant Website

- Served as Frontend Lead in an Agile team environment, delivering a personalized recipe recommendation engine.
- Optimized user experience by levelling up the interface with OpenAI-powered chat functionality.
- Collaborated on rapid prototyping and feature testing to ensure seamless natural language conversation flows.

SKILLS

Languages: English, Korean, Mongolian

Web & Mobile: React.js & Native, Next.js, HTML5, CSS3 (Tailwind)

Backend & Database: MySQL, Firebase, Express.js, Flask, Node.js

AI & APIs: REST APIs, OpenAI API, Groq API, Python AI/ML libraries (NumPy, Matplotlib, etc.)

Tools & Systems: Git, GitHub, Unix/Linux Terminal

FinGuard — Emotion-Driven Personal Financial Risk Database (Database Course Project)

- Designed a complex data architecture featuring schema normalization and behavioral pattern analysis.
- Performed advanced data modeling to classify financial risks based on emotional input.
- Produced structured analytical reports, testing database queries for performance and accuracy.
